What you get with Tobii Pro Glasses 3

**High-quality eye tracking**
Pro Glasses 3 delivers comprehensive and reliable eye tracking data through a number of innovations.

- The system, with a wide-angle scene camera, covers a larger portion of the wearer’s field of view which, delivers more comprehensive gaze data.
- The integration of eye tracking technology into the lenses allows for optimal positioning of the eye cameras and illuminators and removes obstruction to the wearer’s line of sight.
- Tobii’s patented 3D eye model combined with two eye cameras per eye delivers very accurate gaze data with minimal data loss and robust pupil size estimation.
- Slippage compensation technology and persistent calibration enable robust and consistent eye tracking data throughout recordings, even if the glasses move on the participant’s head, or are taken off and on.

**Successful tracking of most people**
Like all our eye trackers, Pro Glasses 3 can be successfully used on a very large proportion of the population regardless of their eye color or shape. This is also supported by a range of product accessories.

- Three interchangeable nose pads which ensure optimal fit for different wearers.
- Snap-on corrective lenses to cater for people with vision impairment.

**Ability to withstand the elements**
Pro Glasses 3 can withstand a range of environmental conditions thanks to optional add-ons and smart design.

- Add-on IR blocking safety lenses (clear and tinted) that are compliant with safety glass standards support research in bright environments and locations requiring eye protection.
- A lightweight and robust design ensures the eye tracker can be worn under helmets and other protective gear with ease.

**Synchronization options**
Get more from your research by combining eye tracking data from Pro Glasses 3 with other biometric measurements.

- Accurately sync eye tracking data with EEG, NIRS, GSR, motion detection, respiration rate, and heart rate monitors.
- Utilize a range of online and offline synchronization methods, like TTL, TCP/IP, and NTP while maintaining the highest level of sync with very low latency.

**Software to support your work from beginning to end**
We have a complete solution for your eye tracking research workflow. Start/stop recordings and view them live on your mobile or other device via our app, and then easily import them into our software for analysis.

- The Glasses 3 controller app works on both Android and Windows devices and allows you to wirelessly view eye tracking recordings live.
- Recorded data can be easily exported into Tobii Pro Lab for deeper analysis. This software includes tools for assisted mapping of data to snapshots, visualizations, and extracting statistics.
- The Tobii Pro Glasses 3 API allows you to build custom solutions and integrations. All data is accessible live through the API, which uses standard protocols to make it easy to consume, for example, with video stream available over web RTC and RTSP.
# Technical specifications

## Eye tracking
- **Eye tracking technique**: Corneal reflection, dark pupil, stereo geometry
- **Binocular eye tracking**: Yes
- **Sampling rate**: 50 Hz or 100 Hz
- **Calibration procedure**: One point
- **Parallax compensation tool**: Automatic
- **Slippage compensation**: Yes, 3D eye tracking mode
- **Pupil measurement**: Yes, absolute measure

## Corrective lenses (optional)
- **Corrective lenses**: 32 pieces, ranging from –5.0 dpt. to +3.0 dpt. in increments of 0.5 dpt. Made of optical-grade plastic with hard coating.
- **Dimensions (height x width x depth)**: 80 x 270 x 370 mm (complete kit)
- **Weight**: 1150 grams (complete kit)

## Glasses 3 controller system requirements
- **Operating System**
  - Windows 10
  - Android 10, 9
- **Processor**
  - Intel® Core™ i5
  - Snapdragon 855
  - Snapdragon 670
  - Exynos 9820
- **Memory**
  - 8 GB RAM
  - 6 GB RAM
- **Audio**
  - 16 bit mono, integrated microphone
- **Scene camera, field of view (diagonal)**: 106 deg. 16:9 format
- **Scene camera, field of view (horizontal and vertical)**: 95 deg. horizontal / 63 deg. vertical
- **Weight**: 76.5 grams including cable
- **Frame dimensions (width x depth x height)**: 153 x 168 x 51 mm
- **Cable length**: 1200 mm
- **Design characteristics**: Light weight and discreet
- **Sensors**: Gyroscope, Accelerometer, Magnetometer: ST™ LSM9DS1 (sampled at 100 Hz)

## Accessories
- **Corrective lenses**
- **IR blocking safety lenses (clear and tinted)**

## Analysis software
- **Tobii Pro Lab**
- **Tobii Pro Glasses 3 API**
- **Any application built on Pro Glasses 3 API**

*Note: Tobii Pro Lab software is purchased separately.*
