Preparing and Connecting Tobii Pro Glasses 2

1 - Charge the batteries
Insert the batteries into the charger. The battery is fully charged when the icon below is displayed on the screen:

2 - Recording Unit preparation
Insert SD memory card.

3 - Attach the Nose Pad
Gently squeeze the nose pads together and insert the Nose Pad into the two holes on the head unit.

4 - Head Unit preparation
Insert HDMI cable.

5 - Powering the Recording Unit
Insert the HDMI cable, then press and hold the power button for a few seconds or until the LEDs stop flashing to turn on your Recording Unit.

6 - Software installation
Download, install and open "Tobii Pro Glasses Controller" on your Windows tablet/computer.

7 - Connecting to your device
If using a wired connection, securely connect the Ethernet cable to the Recording Unit and to your computer.

Wireless
Find and connect to your Pro Glasses 2 via WLAN.

Wired
If using a wired connection, securely connect the Ethernet cable to the Recording Unit and to your computer.

Recording Unit LEDs
- (SD LED off) The SD Memory Card ready or the Recording Unit is powered off.
- (SD LED blinking green) The Recording Unit is busy writing to the SD Memory Card. Do NOT remove the SD Memory Card.
- (SD LED blinking green) Missing SD Memory Card. Insert an SD Memory Card.
- (SD LED solid yellow) The SD Memory Card has critically low storage. SD Memory Card change recommended.
- (SD LED solid red) The SD Memory Card is corrupted. Change the SD memory card.
- (LED Slow blinking) No power to the Head Unit. Ensure the head unit is connected correctly.

Gently fit the Head Unit onto the participant as shown below. Exchange the Nose Pad if necessary.

Wireless
The WLAN password for your Tobii Pro Glasses 2 is "TobiGlasses" with a capital T and G.

The unit is connected to the Tobii Pro Glasses Controller and ready to start a recording.

Connection LED solid green: The Recording Unit is connected to Tobii Pro Glasses Controller.

Connection LED off: The Recording Unit is disconnected from Tobii Pro Glasses Controller.

Power LED off: The Recording Unit is turned off. All other LED indications are off.

Power LED solid green: The battery is good or charging.

Power LED solid purple: The battery is critically low and should be replaced.

Secure the SD Memory Card in the clip.

Calibrating and Recording with Tobii Pro Glasses 2

1 - Creating a new recording
Start up the "Tobii Pro Glasses Controller". If this is your first ever recording, create a new Project before proceeding. Then press "Start New Recording" on the relevant pair of Tobii Pro Glasses 2.

Type the participant's name and relevant info, then press "Create".

2 - Calibrating a participant
Step 1
Gently fit the Head Unit onto the participant as shown below. Exchange the Nose Pad if necessary.

Step 2
Gently attach the Recording Unit to the participant's belt or clothing.

Step 3
Hold the calibration card and have the participant focus on the center point...

Step 4
...then press the calibrate button and allow the calibration process to complete. You are now ready to start recording.

3 - Start a recording
If the calibration is successful, press the record button.

(If not, ask the participant to look at the calibration target again then press the recalibrate button.)

4 - Stop a recording
To stop a recording, press the stop button.

You have now completed a recording with the Tobii Pro Glasses 2.

Tobii Pro Lab Analyzer Edition

1 - Software installation
Download, install and open "Tobii Pro Lab Analyzer Edition" on your Windows tablet/computer.

Step 1
Remove the SD memory card from your Recording Unit and insert it into your computer

www.tobiipro.com/downloads

2 - Create a project
Using the "Tobii Pro Lab Analyzer Edition" choose a name for your new project and where to save it, then press create.

3 - Import your data
At the Project Dashboard press "Import > Glasses Recording". Locate and select the data file (*.tggp) on the SD memory card to import it.

You are now ready to begin analyzing your data.
Please see the USB memory stick included in your package for software, a full User Manual, and an instructional video. These are also available online at:
