1 Introduction

Tobii Pro Glasses 3 is designed to enable easy, precise, and efficient collection of eye tracking data in a wide variety of research scenarios. The discreet, ultra-lightweight design ensures natural behavior and research validity in both qualitative and quantitative situations. Accurate data and robust eye tracking capabilities can be relied on in uncontrolled situations and real-world environments. This document describes how to use Pro Glasses 3 and Tobii Pro Glasses 3 controller application.

1.1 Intended use

Tobii Pro Glasses 3 is a wearable eye tracker for academic, commercial, and industrial use for the capture of truly objective and deep insights into human behavior in a real-world environment. Pro Glasses 3 is designed to capture what the wearer is viewing while providing robust and accurate eye-tracking data. The complete Pro Glasses 3 product package consists of a head unit, a recording unit, and the Tobii Pro Glasses 3 controller application installed on an external device.

The product should only be used as described in the Pro Glasses 3 User Manual. Please read the User Manual and other supplied documentation thoroughly before using the product.

This product is continuously being developed and refined. Visit Tobii Pro Connect for the most recent specifications for Pro Glasses 3 and for the latest version of this document.

1.2 Documentation

Further documentation is available for viewing and download at Tobii Pro Connect.

- Pro Glasses 3 Developer Guide

### 1.3 Symbols used in this document

Three different symbols are used in this document:

- The **Information** symbol means something is important or needs special attention.

- The **Tip** symbol denotes additional information that can make a process or function easier.

- The **Warning** symbol means there is a possible risk of harm if the warning is ignored.
2 System Requirements

2.1 Tobii Pro Glasses 3 controller application requirements

<table>
<thead>
<tr>
<th>Operating system</th>
<th>Windows® 10</th>
<th>Android™ 10, 9</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processor</td>
<td>6th Generation Intel® Core™ i5 (Dual core) or equivalent</td>
<td>Snapdragon 835 or equivalent</td>
</tr>
<tr>
<td>Memory</td>
<td>8 GB RAM</td>
<td>6 GB RAM</td>
</tr>
</tbody>
</table>

There are many variants of Android devices, with a wide range of different hardware configurations. While most devices meeting the minimum requirements should work with the Glasses 3 controller application, we cannot guarantee it. Below you will find a table listing the Android devices we have tested and verified will work.

<table>
<thead>
<tr>
<th>Manufacturer</th>
<th>Device</th>
</tr>
</thead>
<tbody>
<tr>
<td>Samsung</td>
<td>Galaxy Tab S5e</td>
</tr>
<tr>
<td>Samsung</td>
<td>Galaxy S10</td>
</tr>
<tr>
<td>Google</td>
<td>Pixel 4 XL</td>
</tr>
</tbody>
</table>

2.2 Additional software options for Pro Glasses 3

<table>
<thead>
<tr>
<th>Tobii Pro Lab</th>
<th>Pro Lab is a comprehensive research software platform for eye tracking designed to meet the highest demands on different research scenarios with exact timing accuracy. This software offers an efficient workflow, making it easy to design experiments, record data, analyze and visualize eye tracking data, and to sync this data with other biometric data streams.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Third-party software</td>
<td>This term refers to any application built on Pro SDK.</td>
</tr>
</tbody>
</table>
3 Safety

3.1 General precautions

The Pro Glasses 3 system is described in the Pro Glasses 3 User Manual and must be used according to the manufacturer’s instructions. Connecting any other component to the system, or using the components improperly can cause injury to the user or damage to the equipment and is done so entirely at the user’s own risk.

The Pro Glasses 3 system must be fitted on the test participant according to instructions in the Pro Glasses 3 User Manual. Tobii Pro or its agents are not liable for damage or injuries to a person or their property due to a Pro Glasses 3 eye tracker system in any configuration being dropped. Fitting the Pro Glasses 3 onto a test participant is done entirely at the user’s own risk.

The Pro Glasses 3 system is to be used for research purposes only. Be aware that due to the low, but possible risk of failure or distraction, the Pro Glasses 3 should not be relied upon or used in dangerous or otherwise critical situations.

Tobii Pro Glasses 3 head unit is equipped with a head strap to enable tighter mounting of the eye tracker onto the wearer’s head. Neither Tobii Pro nor its agents are liable for damages or injuries to a person or their property caused by the Pro Glasses 3 head unit head strap.

3.2 Usage warning

The Pro Glasses 3 system is composed of several components as described in the User’s Manual and should be used according to manufacturer instructions. Connecting, or by other means using any other component than advised in the User’s Manual may damage or injure a person, their property or recorded data, and is done entirely at the user’s own risk.

Pro Glasses 3 eye tracker should be fitted on the test participant according to manufacturer instructions. Tobii Pro or its agents are not liable for damage or injuries to a person or their property due to a Pro Glasses 3 eye tracker being dropped in any configuration. Fitting the Pro Glasses 3 onto a test participant is done entirely at the user’s own risk.

Pro Glasses 3 head unit is equipped with a head strap to enable tighter mounting of the eye tracker onto the wearer’s head. Neither Tobii Pro nor its agents are liable for damages or injuries to a person or their property caused by the Pro Glasses 3 head unit head strap.
3.3 Emergency

The Pro Glasses 3 system is to be used for research purposes only. Be aware that due to the low, but possible risk of failure or distraction, the Pro Glasses 3 should not be relied upon or used in dangerous or otherwise critical situations.

3.4 Child warning

The Pro Glasses 3 is an advanced computer system and electronic device that is composed of numerous separate, assembled parts. These parts have the possibility of becoming separated from the device, constituting a potential choking hazard or other danger to a child. Young children should not have access to, or use, the device without parental or guardian supervision.

3.5 Infrared warning

Do not use the Pro Glasses 3 system when in the vicinity of devices that are susceptible to Infrared (IR) light. When activated, the Pro Glasses 3 head unit emits IR light, which can affect certain medical devices and other devices that are susceptible to disturbance by IR light and/or radiation.

3.6 Photosensitivity/epilepsy warning

Some people with photosensitive epilepsy are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns in everyday life. This may happen even if the person has no medical history of epilepsy or has never had any epileptic seizures.

A person with photosensitive epilepsy would also be likely to have problems with TV screens, some arcade games, and flickering fluorescent bulbs. These people may have a seizure while watching certain images or patterns on a monitor, or even when exposed to the light sources of an eye tracker. It is estimated that about 3-5% of people with epilepsy have this type of photosensitive epilepsy. Many people with photosensitive epilepsy experience an "aura" or feel odd sensations before the seizure occurs. If the participant starts to feel odd during use, have them remove the Pro Glasses 3 head unit immediately.
3.7 Mechanical shock
   The Pro Glasses 3 system is a delicate measuring instrument used for research purposes and should be treated with care at all times. To avoid breaking or damaging the internal electronic circuits, do not drop, knock, or shake the device. Eye tracking quality or accuracy can be seriously affected if the Pro Glasses 3 head unit or recording unit are dropped. If the eye tracker is exposed to mechanical shock, for example, when dropped, do not try to start it or connect it to a power source. Contact Tobii Pro Support for instructions.

3.8 Bending
   To avoid breaking or damaging the internal electronic circuits, do not bend any part of the eye-tracking system. Eye-tracking quality or accuracy can be seriously affected if the Pro Glasses 3 head unit or recording unit has been bent.

3.9 Do not open or disassemble
   Do not open or disassemble the Pro Glasses 3 head unit or the recording unit. Non-compliance will result in loss of warranty! There are no user serviceable components inside. Contact Tobii Pro Technical Support if your Pro Glasses 3 system is not working properly.

3.10 Connectors
   The Pro Glasses 3 head unit and recording unit have numerous external interfaces (connectors). Connecting any other device or connector than those intended may cause personal injuries and/or damage the Pro Glasses. Tobii Pro or its agents are not liable for any damages or injuries to a person or their property due to connecting unintended connectors.

3.11 Head unit cable
   The head unit cable connected to the head unit must only be used to connect to the recording unit. Do not use the head unit cable for any other purpose or for connecting to any other devices. Tobii Pro or its agents are not liable for any damages or injuries to a person or property due to incorrect use of the head unit cable.

3.12 Environment
   Avoid any exposure to direct sunlight as this will affect eye tracking quality and longer exposure can overheat the equipment. Avoid prolonged exposure to any liquids, gels, moist, rain, or sweat. Do not use the eye tracker underwater.
Do not place or use the equipment in places subject to extreme temperatures and humidity, such as on top of and or near a heating element, in a hot or damp room, or in a hot automobile in the sun. Usage temperature: 5°C to +45°C / 23°F to 113°F.

3.13 Component connection safety

The Tobii Pro Glasses 3 head unit is designed to connect only to the Tobii Pro Glasses 3 recording unit and should not be connected to any other device.

The recording unit is designed to connect only to the head unit and a device running Windows 10 or later operating system, or an Android device with version 9 or later, and with the Glasses 3 controller application installed. The recording unit should not be connected to any other devices.

3.14 Battery safety

Caution!

There is a risk of explosion if the battery is replaced by an incorrect type.

Replacement of a battery with an incorrect type can defeat safeguards (for example, in the case of some lithium battery types).

Disposal of a battery in a fire or a hot oven, or mechanically crushing or cutting of a battery can result in an explosion.

Batteries exposed to extremely high temperatures or environments can result in an explosion or leakage of flammable liquid or gas.

Batteries subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas.

Attention!

Risque d'explosion en cas de remplacement de la pile par une pile de type incorrect.

Le remplacement d'une PILE par une pile de type incorrect peut neutraliser un SYSTÈME DE SÉCURITÉ (par exemple dans le cas de certains types de PILES au lithium).

La mise au rebut d'une PILE dans le feu ou dans un four chaud, ou par écrasement ou découpe, peut entraîner une EXPLOSION.
3.15 Wireless warning

The recording unit contains radio transmitters and receivers (WLAN). Make sure that it is placed as far as possible from any equipment, objects or body parts sensitive to such signals.

電波法により5GHz帯は屋内使用に限ります。

3.16 Transportation

Use the provided case when traveling with the eye tracker. For shipping and storage, use the original packing.

For transportation, the recommended range for temperature and humidity for the device is as follows:

- **Temperature**: -40°C to 65°C (-40°F to 149°F)
- **Humidity**: 5% to 95%

ETSi 300 019-2-2 V2.4.1, T2.3 (Public transportation) with exception of high air temperature at +65°C.

3.17 Accessories

Only use accessories provided by or approved by Tobii Pro.

3.18 Cleaning

Avoid touching, scratching, or smudging the lenses on the Pro Glasses 3 head unit or the Corrective Lenses (optional accessory) and keep all the surfaces clean. Eye tracking quality may be degraded if surfaces are dusty or damaged. Take special care to ensure that there are not smudges or scratches covering either the illuminators or sensors in the lenses as these can impair performance.
Do not use window cleaners, household cleaners, aerosol sprays, solvents, alcohol, ammonia, or abrasives on any component of the Pro Glasses 3 system.

Before cleaning Pro Glasses 3, unplug the head unit cable.

Use the included cleaning cloth and clean the Pro Glasses 3 lenses gently.

Avoid getting moisture in openings and ports on the device.

### 3.19 California Proposition 65 warnings

**WARNING:** The batteries in this product can expose you to chemicals including Carbon-Black Extracts and Nickel (Metallic), which is known to the State of California to cause cancer. For more information, visit [P65Warnings.ca.gov](http://P65Warnings.ca.gov).

**WARNING:** The Tobii Pro Recording Unit in this product can expose you to chemicals including Carbon-Black Extracts and Nickel (Metallic), which is known to the State of California to cause cancer. For more information, visit [P65Warnings.ca.gov](http://P65Warnings.ca.gov).

**WARNING:** The USB-C to Gigabit Ethernet Adapter in this product can expose you to chemicals including Lead and Bisphenol A (BPA), which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, visit [P65Warnings.ca.gov](http://P65Warnings.ca.gov).

**WARNING:** The head strap in this product can expose you to Di(2-ethylhexyl)phthalate (DEHP) and Bisphenol A (BPA), which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, visit [P65Warnings.ca.gov](http://P65Warnings.ca.gov).

**WARNING:** The foam in the carrying bag in this product can expose you to Benzo[b]fluoranthene, Benzo[j]fluoranthene, Benzo[k]fluoranthene and Indeno[1,2,3-cd]pyrene, which is known to the State of California to cause cancer. For more information, visit [P65Warnings.ca.gov](http://P65Warnings.ca.gov).

**WARNING:** The AC/DC Adapter including the USB cable in this product can expose you to chemicals including Bisphenol A (BPA), which is known to the State of California to cause birth defects or other reproductive harm. For more information, visit [P65Warnings.ca.gov](http://P65Warnings.ca.gov).
4  Overview of Tobii Pro Glasses 3

Congratulations on your purchase of Tobii Pro Glasses 3. They’re created with active researchers in mind and give you the freedom to take your research further with wider gaze angles and comprehensive data on visual attention.

4.1  Pro Glasses 3 packages

Pro Glasses 3 is sold in four different packages. The table below details the specific features available in each package.

<table>
<thead>
<tr>
<th>Components</th>
<th>Pro Glasses Cabled 50</th>

4.2  What’s in the box

Tobii Pro Glasses 3 ships with a convenient carry case containing the following:
<table>
<thead>
<tr>
<th>1. Recording unit</th>
<th>6. Calibration card</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Head unit</td>
<td>7. Cleaning cloth</td>
</tr>
<tr>
<td>3. Removable nose pads (4 pcs in two different sizes)</td>
<td>8. Head strap</td>
</tr>
<tr>
<td>4. Rechargeable Li-ion batteries, type 18650 (3 pcs)</td>
<td>9. Cable clip</td>
</tr>
<tr>
<td>5. SD cards with cases (3 pcs)</td>
<td></td>
</tr>
</tbody>
</table>

Pro Glasses 3 User Manual v 1.3
There is also an accessories box which contains the following items:

<table>

### 4.3 Optional accessories

The following optional components can be added to the Pro Glasses 3 system. Learn more on tobiipro.com.
### 4.4 System components

The Pro Glasses 3 system is comprised of the head unit, recording unit, and the Pro Glasses 3 controller application installed on either a computer running Windows 10 or later, or on an Android device running version 9 or later. Each component is briefly described below. In addition, Tobii Pro Lab software (purchased separately) can be used for further analysis of eye tracking data.

**The system:**

1. The head unit, comprised of wearable eye tracking glasses.
2. A recording unit, connected to the head unit via a head unit cable. The recording unit holds the battery and stores the recorded data on a SD card. The recording unit is controlled from a device running Pro Glasses 3 controller application.
3. Pro Glasses 3 controller application is used to manage the participants, start and stop recordings, and to view real time and recorded video and eye-tracking data.
   
   Pro Glasses 3 controller application is designed to be installed and used on a computer running Windows 10 or later or an Android device running version 9 or later. The application should not be installed on any other type of devices.

4. Either a computer running Windows 10 or later, or an Android device running version 9 or later with Pro Glasses 3 controller application installed. Pro Glasses 3 controller application connects to the eye tracker through an network connection (either wireless or wired).
5. Tobii Pro Lab (purchased separately) installed on a Windows computer. Any eye-tracking analysis beyond qualitative analysis of eye-tracking session replay, is carried out using Tobii Pro Lab.

   The Pro Glasses 3 controller application is designed to be used only with Pro Glasses 3. No other types of eye trackers can or should be used together with the Pro Glasses 3 controller application.

### 4.5 Head unit

The head unit is a highly sophisticated measuring device. It consists of several very sensitive sensors and must be cared for correctly. For more information, read [Product Care](#).

---

**Table 4.4.1: Component Description**

<table>
<thead>
<tr>
<th>Component</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Corrective Lenses</td>
<td>Snap-on corrective lenses for Tobii Pro Glasses 3 used with people who wear prescription lenses. The Corrective Lenses accessory for Pro Glasses 3 is a set of attachable lenses to correct both nearsightedness and farsightedness. This accessory allows you to include a larger cross-section of the population in your research.</td>
</tr>
<tr>
<td>Safety Lenses</td>
<td>This accessory package contains two lenses (clear and tinted) that are compliant with safety glass standards to support research in bright environments and locations requiring eye protection.</td>
</tr>
</tbody>
</table>
The head unit consists of the following parts:

<table>
<thead>
<tr>
<th>Part</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Infrared illuminators (x 8 per eye)</td>
<td>Illuminates the eyes to assist the eye-tracking sensors</td>
</tr>
<tr>
<td>2. Head unit cable</td>
<td>Connects to the recording unit to save collected data</td>
</tr>
<tr>
<td>3. High-definition scene camera</td>
<td>Captures a Full HD video of what is in front of the participant</td>
</tr>
<tr>
<td>4. Microphone</td>
<td>Picks up sounds from the participant and their immediate surroundings</td>
</tr>
<tr>
<td>5. Eye-tracking cameras (x 2 per eye)</td>
<td>Records eye orientation and movements</td>
</tr>
<tr>
<td>6. Accessory attachment</td>
<td>Used to attach some of the optional accessories, for example the Safety Lens</td>
</tr>
<tr>
<td>7. Nose pad</td>
<td>Additional nose pads can be used to change sizing</td>
</tr>
</tbody>
</table>
4.6 Recording unit

The recording unit is a small computer that controls the head unit. It records and stores eye-tracking data, sounds, and scene camera video on a removable SD card. The recording unit carries a replaceable and rechargeable Li-ion battery that supplies power to both the recording unit and the head unit. The recording unit has several connectors and a power button and is controlled from Pro Glasses 3 controller application.

The recording unit consists of the following parts:

<table>
<thead>
<tr>
<th>Part</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Head unit connector</td>
<td>Connects to the head unit cable</td>
</tr>
<tr>
<td>2. Micro USB connector</td>
<td>Connects to USB charger for powering the unit and charging the battery</td>
</tr>
<tr>
<td>3. 3.5 mm connector for data synchronization</td>
<td>TTL pulse for synchronization with external data sources</td>
</tr>
<tr>
<td>4. Power button and LED power indicator</td>
<td>Touch button that turns the recording unit on and off. LED power indicator indicates power state and remaining battery power</td>
</tr>
<tr>
<td>5. SD card Activity LED</td>
<td>Indicates if SD card is present and if the recording unit is currently saving data to the SD card</td>
</tr>
<tr>
<td>6. Connection status LED</td>
<td>Indicates connection to the head unit</td>
</tr>
</tbody>
</table>
7. LAN port | Connects to a device running the Pro Glasses 3 controller application, via the supplied Ethernet cable. The recording unit can also be connected to a device via WLAN*.

8. SD card slot | Slot for SD card

9. Belt clip | Attaches the recording unit to participant's belt

10. Battery compartment | Holds the Li-ion battery

---

* Not available in the Tobii Pro Glasses 3 Live View Package

The Pro Glasses 3 package contains an external SD card reader for use with computers that are not equipped with an internal SD card reader. For installation instructions, see the documentation in the SD card reader's package or the manufacturer's website.

4.6.1 Recording unit status LEDs

There are three LED indicators on the recording unit: the Power Indicator, the Connection Status, and the SD card Activity.

The image below illustrated the different meanings of the recording unit's status LEDs. When lights are blinking yellow, a message will also display on Pro Glasses 3 controller application.

<table>
<thead>
<tr>
<th>Power Indicator Status</th>
<th>LED</th>
<th>SD Card Activity Status</th>
<th>LED</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recording unit is ready to be powered on</td>
<td>LED off</td>
<td>Recording unit is ready to start recording. The SD card can be removed</td>
<td>Solid green</td>
</tr>
<tr>
<td>The recording unit is powered on. ~30-100% of battery power is remaining</td>
<td>Solid green</td>
<td>There is 15 minutes or less of recording time left on the SD card</td>
<td>Solid red</td>
</tr>
<tr>
<td>The recording unit is powered on. ~10-29% of battery power is remaining (approx. 15 minutes)</td>
<td>Solid red</td>
<td>There is less than 5 minutes of recording time left on the SD card</td>
<td>Blinking red</td>
</tr>
<tr>
<td>Battery charge is critically low, approx. 5 minutes or less remaining. (User must replace the battery. The recording unit will stop the recording immediately.)</td>
<td>Blinking red</td>
<td>There is an error with the SD card and it cannot be written to</td>
<td>Blinking yellow</td>
</tr>
<tr>
<td>The battery inside the recording unit is charging via the USB port</td>
<td>Blinking green</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
4.7  Pro Glasses 3 controller application

The Pro Glasses 3 controller application is used to manage recordings made using the recording unit. It can perform the following functions:

- Manage participant information
- Manage recordings
- Show live view of the scene camera with gaze overlay
- Instant replay of recordings
- Perform personal calibration

The Pro Glasses 3 controller application is optimized for easy and efficient data collection with Pro Glasses 3. The application also supports a basic replay functionality for qualitative observational analysis and for validation of recorded data. For more in-depth analysis, we recommend using Tobii Pro Lab. Find out more information about Pro Lab on the Tobii Pro website.

4.7.1  Pro Glasses 3 controller menu

The Pro Glasses 3 controller menu is used to switch between the RECORD screen and the VIEW RECORDINGS screen.

<table>
<thead>
<tr>

4.7.3 View recordings

View Recordings lists all of the recordings stored in the SD card of the connected recording unit. From this screen, it is possible to playback or delete a recording.
All video and eye-tracking data is stored on the SD card inside the recording unit. This means that for any replay to work, the recording unit, complete with the SD card that was used for recording, must be connected to the device running Pro Glasses 3 controller application. For best performance, use a wired connection.

5  Set up Pro Glasses 3

This section describes how to assemble and prepare the head unit and the recording unit, and how to download and install the Pro Glasses 3 controller application.

To get Pro Glasses 3 ready for use, follow the instructions in the sections below.

5.1  Prepare the head unit

Before using Tobii Pro Glasses 3, there are a few optional adjustments you can choose to make.

5.1.1  Attach a different nose pad

Pro Glasses 3 comes with four additional nose pads (2 x 2 different sizes) that can be attached to the built-in nose pad on the head unit. If necessary, use these to ensure that the Pro Glasses fits comfortably on the participant’s face.

Push the top of the nose pad against the lip of the nose pad mount.
Holding the top of the nose pad in place, push the bottom of the nose pad onto the frame until you hear a click and it snaps into place.

5.1.2  Remove the nose pad

To remove the nose pad, do the following:

1. Place your index finger on the top of the nose pad.
2. With your thumb and middle finger, gently squeeze the bottom tips together and pull the nose pad away from the bottom.

5.1.3  Prepare the Corrective Lenses (optional)

The Corrective Lenses is an optional accessory. Please see the Corrective Lenses User Manual for more information on attaching them to Pro Glasses 3.

5.2  Prepare the recording unit

This section prepares the recording unit for use, including updating the firmware.

5.2.1  Insert/remove the battery

⚠️ Only use the rechargeable Li-ion batteries (type 18650, 3.6 volts) supplied by Tobii Pro in the recording unit.
How to insert the battery into the Pro Glasses 3 recording unit.

1. Turn off the recording unit.
   - Wait until all LEDs are off before removing the battery or SD card. For more information, read Recording unit status LEDs.

2. Press in the battery compartment cover and turn counter-clockwise. Stop pressing in the cover to release it and open the battery compartment.
3. Remove any partially or fully depleted battery and insert a new one.
4. Put the battery container lid back on and lock it by pressing it in and turning it clockwise.

- Never insert batteries the wrong way in the recording unit as this may damage the device. The battery should be inserted with the positive end (+) at the top of the recording unit and the negative end (-) against the bottom.
- Never insert any other type of batteries than the Li-ion batteries (type 18650, 3.6 volts) supplied by Tobii Pro in the recording unit as this may damage the device permanently.

5.2.2 Charge the battery using the battery charger

When charging recording unit batteries, use the supplied battery charger. Use only batteries supplied by Tobii Pro. Charging the battery inside the recording unit by using the USB charger should only be considered a backup solution.

1. Take out the battery charger that came with the Pro Glasses 3.
2. Pull down the bottom spring-tensioned tabs and insert rechargeable batteries with the positive end (+) at the top of the charger and negative end (-) against the bottom spring tab.
3. Plug the power cord into a standard AC outlet.
4. Check the charge of the inserted battery on the LCD screen.
No battery is loaded OR the battery has been damaged OR the battery has been inserted upside down.

Charging in progress with battery voltage displayed and capacity bar flashing.

Fully charged (4.2Volts) as indicated by battery voltage display and the five solid bars in the battery.

Charging in progress, normal speed (500mA/h)

Charging in progress, high speed (1000mA/h).

5. Use the red buttons above the batteries to toggle between 500 mA (normal) and 1000 mA (high speed) charging. Note that high speed charging will reduce the cycle life and maximum deliverable capacity of the battery. We recommend to only use high speed charging if the situation demands it. Normal charging should always be used by default to extend battery life and capacity.

6. Remove the batteries and unplug the power cord when done charging.

The Pro Glasses 3 system includes rechargeable Lithium-ion batteries. Lithium-ion batteries can explode or cause a fire if they are used or charged incorrectly or if they are defective.

Do not short-circuit the battery. Do not expose the battery to water or humidity. Do not expose batteries to heat, direct sunlight, solder or fire. Immediately disconnect the batteries if, during operation, they emit an unusual smell, feel hot, change shape/dimensions, or behave abnormally. Do not use any defective batteries.
To recharge the batteries, use a battery charger specifically designed for the purpose and observe the recharging instructions specified by the manufacturer of the charger. Charge the batteries under supervision and do not place combustible materials close to or on top of the batteries or the charger, as this may result in overheating, explosion or fire.

Never install batteries backwards or attempt to charge non-rechargeable batteries in the battery charger.

Only use batteries supplied by Tobii Pro.

Use the charger only as instructed.

High speed charging (1000 mA) reduces battery life and capacity. Use it sparingly.

Stop using the battery charger if the battery contacts, cord, or charger are/is dropped or damaged in any way.

Always disconnect the power supply and remove the batteries when charging is complete.

Do not attempt to charge with AC and car outlet at the same time.

Under no circumstances should the charger be dismantled, modified, or used for other purposes.

Keep the charger out of the reach of children.

5.2.3 Charge the Pro Glasses 3 recording unit battery using the USB charger

We recommend charging the batteries using the supplied, stand-alone battery charger. For more information, read Charge the battery using the battery charger. You should only charge a battery inside the recording unit with the supplied USB charger as a backup solution. If the recording unit is in use while it is being charged with the USB charger, the recording unit may become hot. If so, stop charging the battery immediately.

**How to charge a battery inside the recording unit:**

1. Take out the USB charger that came with the Pro Glasses 3.
2. With the battery inside the recording unit, connect the micro USB cable to the recording unit.
3. Plug the USB charger into a standard AC outlet. The Power LED on the recording unit will blink green when the battery is being charged.

Only use the USB charger and cable provided by Tobii Pro.
5.2.4 Change a SD card in the recording unit

1. If the recording unit is on, make sure the SD card activity LED is not lit before removing the SD card. For more information, read Recording unit status LEDs.
2. Open the SD card cover on the recording unit.
3. Release the SD card by firmly pressing and releasing the SD card inside the recording unit.
4. Remove the SD card.
5. Gently insert a new SD card into the SD card slot.
   - The contacts of the SD card must face towards the front of the recording unit.
6. Close the SD card cover.

- Never remove the SD card from the Pro Glasses 3 recording unit while a recording is ongoing. Doing so corrupts any data being recorded.
- The recording unit only supports SD cards formatted as (recommended) exFAT or FAT32. Make sure any new SD cards are formatted to FAT32 or exFAT before inserting them in the recording unit.
- SD card formatted with FAT32 has a file size limit of 4 Gb. This means it is only possible to record videos somewhere between 45 min – 1 hour 45 minutes in length. The exact recording time differs depending on the light conditions during the recording. If you plan to record longer periods than 45 minutes, make sure the SD card used is formatted to exFAT.
- Do not change the name of, or move, files and folders on the SD card. Doing so may make Pro Glasses 3 controller application and Tobii Pro Lab unable to find them.

5.2.5 Connect the head unit cable

The head unit cable from the head unit connects to the recording unit as shown below.
Do not change the head unit while the recording unit is powered on.

If the head unit is disconnected from the recording unit after the system has booted, it is important to reconnect the same head unit in order for the eye tracking to be correct. If a different head unit is connected after the system has booted the hardware configurations for the system will be invalid and the eye tracking will not be correct.

If for any reason you wish to change the head unit, the system must be booted with the new head unit already connected to the recording unit.

5.2.6 Update the Pro Glasses 3 firmware

Tobii Pro periodically releases new updates of the Pro Glasses 3 firmware that will improve performance and/or introduce new functionality. You can update the firmware via Pro Glasses 3 controller application. If the device is online, Pro Glasses 3 controller application shows an indicator in the list of glasses when new firmware is available. The Pro Glasses 3 may also be updated using an SD card with the new firmware. If this alternative is necessary, contact Tobii Pro Customer Support for further instructions and to download the latest firmware.

Start the firmware update process with a fully charged battery.

How to update the recording unit firmware:

1. Make sure the device running Pro Glasses 3 controller application is connected to the recording unit and that the recording unit is turned on.
2. In the application, select the Glasses icon to display a list of connected Glasses. A green indicator means a firmware update is available.
3. Select the cogwheel icon next to the relevant Glasses unit.
4. Select **Upgrade Firmware**.
5. Follow the instructions on your screen.
6. During the firmware upgrade process, Pro Glasses 3 will disconnect from your device and the recording unit will continue updating on its own. Please leave the recording unit alone/uninterrupted and allow up to 15 minutes (or until the LED indicator lights become static) for this process to complete safely.
7. Once finished, turn off and then turn on the recording unit, and connect it to your device again to verify the new firmware version.

   Pro Glasses 3 need to be periodically connected to the internet in order to receive timely firmware updates.

**5.3 Install and Update Pro Glasses 3 controller application**

The Pro controller application is designed to be installed on either a computer running Windows 10 or later or on an Android device running version 9 or later.

**5.3.1 Download and install Pro Glasses 3 controller application for Windows**

A QR code containing the download link to the installer for Pro Glasses 3 controller is in the Pro Glasses 3 carry case. Alternatively, the latest version of Pro Glasses 3 controller application can be downloaded from [Tobii Pro Connect](http://www.tobii.com). For best performance, check for application updates frequently and install available new releases.

To install the Pro Glasses 3 controller application, do the following:

1. Download the Pro Glasses 3 controller installer.
2. Tap or double click the installer file.
3. Follow the on-screen instructions to install the file.
4. To launch Pro Glasses 3 controller application, double-click the Glasses 3 icon on your desktop.

   Pro Glasses 3 controller application uses the following ports to communicate with the recording unit: 5353 (udp), 80 (tcp, http). Please make sure to allow the application to use these ports in Windows Firewall.

   We recommend you don’t install any antivirus software on your device because these might block communication between your device and the Pro Glasses 3. For best performance, also avoid installing any application that relies on constant Internet access such as communication or media software.

**5.3.2 Download and install Pro Glasses 3 controller application for Android**

Pro Glasses 3 controller can be run from any device running Android 9 or later. To install Pro Glasses 3 controller application for Android, do the following:
1. Open Google Play™ on your Android device.
   If you do not have access to the Google Play store on your device, Pro Glasses 3 controller can be downloaded directly from Tobii Pro Connect.

2. Search for Tobii Pro Glasses 3 controller application. It is published by Tobii Pro AB.
3. Tap Install.
   To get the latest updates of the Pro Glasses 3 controller application, allow Auto download over Wi-Fi in the settings for your Android device. This can be found under Settings > Software update.

5.3.3 Update Pro Glasses 3 controller application
When a new version of Pro Glasses 3 controller application is available, the user gets notified with an alert symbol at the top of the user interface if the device is online.

Procedure for updating Pro Glasses 3 controller application:
1. Select the alert symbol.
2. Select Release Notes and read the release notes.
3. Select Update.
4. Follow the instructions on the screen.

5.4 Connect the Pro Glasses 3 system
In order for Pro Glasses 3 controller application to be able to send or receive information to or from Pro Glasses 3, the recording unit and the device running Pro Glasses 3 controller application must be connected to each other. The connection can either be established over WLAN (wireless) or with an Ethernet cable. The recording unit works as a network access point. A device running the Pro Glasses 3 controller application connects to it the same way that a computer connects to a network.

5.4.1 Connect via Wi-Fi (Access Point)

How to connect Pro Glasses to Pro Glasses 3 controller application via Wi-Fi:
1. Connect the Pro Glasses 3 recording unit to the head unit.
2. Turn on the recording unit.
3. Go to the Wi-Fi settings on your device that has Pro Glasses 3 controller application installed:
a. If using a Windows computer, click the network icon in the bottom right of the screen. Networks settings on the computer must be set to *Obtain an IP address automatically* for the connection to work correctly. Most computers have this as the default setting.

b. If using an Android device, navigate to **Settings** and select **Network & Internet**.

4. Wait for the list of available Wi-Fi networks to appear. This might take a few minutes to complete.

5. Select the Wi-Fi network name that corresponds to “TPG03B+serial number” and click **Connect**.

The serial number is located on the label on the back of the recording unit.

6. Enter the Wi-Fi password **TobiiGlasses** into the network security field and click **Next**.

7. Confirm that the recording unit now appears in the list of connected Glasses units in Pro Glasses 3 controller application.

Pro Glasses 3 supports 802.11 a/b/g/n Wi-Fi standard [also known as Wi-Fi 1(a),2 (b),3(g),4 (n)]. Most adapters automatically detect a device’s supported Wi-Fi standard when they are set to automatic.

Wi-Fi 802.11ac and Wi-Fi 5 standards are not supported.

5.4.2 Connect using a cable (Direct)
How to connect Pro Glasses to Pro Glasses 3 controller application using an Ethernet cable:

1. Locate the LAN port on your computer, or install a USB Ethernet adapter if there is no available Ethernet port.
2. Disable the Wi-Fi (if connected). Some laptops have a physical button specifically for turning on/off Wi-Fi. Alternatively, go to the Wi-Fi settings in Microsoft Windows to turn it off.
3. Turn on the recording unit.
4. Connect the Ethernet cable to the LAN port on the computer and to the recording unit’s LAN port. When the network is established, the glasses will appear in the list of available glasses in Pro Glasses 3 controller application. This can take up to a few minutes.

   The connection is lost if the Ethernet cable is unplugged or if the computer or the recording unit is turned off. When there is no connection between Pro Glasses 3 controller application and the recording unit, the Glasses control panel displays *Disconnected*. The connection is re-established when the Ethernet cable is reconnected.

5.4.3 Connect using a router

How to connect Pro Glasses to Pro Glasses 3 controller application using a router:

1. Connect your computer to the router via Wi-Fi or a cable.
2. Turn on the recording unit.
3. Connect the cable from the recording unit to your router.
4. Pro Glasses 3 is now connected.
6 Operation

Pro Glasses 3 recordings are initiated from the Pro Glasses 3 controller application on your device. Before you start or stop a recording, make sure the recording unit is correctly connected over WLAN or Ethernet to your device with Pro Glasses 3 controller application.

6.1 Prepare the Pro Glasses 3 system

The following steps are necessary before starting to make a recording.

6.1.1 Fit the Pro Glasses 3 head unit

Before fitting the head unit to the participant, ensure the following:

- All optical parts, such as eye-tracking cameras and IR illuminators are clean and undamaged
- Pro Glasses 3 controller application is running on the connected device
- The recording unit is switched on
- The RECORD screen shows a connection between the controller application and the recording unit

1. Fit the head unit on the participant. For more information, read Prepare the head unit.
   - Use the head strap to secure the head unit on the participant’s head. This will reduce the risk of the head unit falling.

2. Check that the glasses fit comfortably and securely.
3. Check that the glasses are correctly positioned on the participant’s head with their eyes positioned in the center of the lenses.
4. If the glasses are not positioned correctly, change the nose pad. See Attach a different nose pad.
5. Secure the head unit cable to the participant’s clothes using the Clip.
6. Attach the recording unit to the participant, usually either on the belt or waistband, or in a back pocket.

   The recording unit can become warm during use. Do not place the recording unit in direct skin contact with the participant.
6.1.2 Turn the Pro Glasses 3 Eye Tracker on and off

How to turn on the Pro Glasses 3 Eye Tracker

1. Make sure the head unit and recording unit are properly connected to one another.
2. On the recording unit, press and hold the power button until the Connection Status LED and the SD card Activity LED flash green.

⚠️ Do not unplug the head unit while the recording unit is powered on. If you need to turn the head unit on after accidentally unplugging it, turn off the recording unit before plugging in the head unit again.

More information: If the head unit is disconnected from the recording unit after the system has booted, it is important to reconnect the same head unit in order for the eye tracking to be correct. If a different head unit is connected after the system has booted, the hardware configurations for the system will be invalid and the eye tracking will not be correct.

⚠️ If for any reason you wish to change the head unit, the system must be booted with the new head unit already connected to the recording unit.

How to turn off the Pro Glasses 3 Eye Tracker

1. On the recording unit, press and hold the power button. All three LEDs will blink yellow.
2. Wait for the LEDs to stop blinking yellow and turn solid yellow, then release the power button.
3. Wait for all three LED indicators to turn off.

ℹ️ For more information on the indicator LEDs and their responses, read Recording unit status LEDs.
6.2 Make a recording

Making a recording consists of the following steps:

1. Start controller.
2. Enter the participant name.
3. Calibrate the head unit.
4. Verify the calibration.
5. Start the recording.
6. Stop or end the recording.

6.2.1 Enter the participant name

How to add a new participant:

1. Start Pro Glasses 3 controller application.
2. Open the study.
3. Select RECORD in the side menu bar.

4. Select the glasses from the list. (If there is only one pair of glasses, it is automatically selected.)

5. Enter the participant’s name into the text field at the bottom of the screen
6. Click **NEW RECORDING**.

6.2.2 Calibration

To collect accurate eye-tracking data, Pro Glasses 3 must be calibrated individually for each participant. During the calibration process, the participant must wear the head unit and focus their gaze on the center of the calibration card.

The **red circle** (gaze target) shows what the participant is focusing their eyes on. Before calibration the gaze target will not accurately show where the participant is focusing.

The **green circle** (calibration marker) shows what the calibration is tracking.
1. Hold the calibration card facing the participant at about arm’s length, 0.5 to 1 m (20” – 40”).

   Make sure that the calibration card is visible in the scene camera RECORD screen.

   The calibration card is not required to be in the center of the scene camera view. Hold the calibration card in the area of the view where you want the most accuracy.

2. Ask the participant to focus on the center of the calibration card. The green calibration marker should be stable and centered around the calibration card.

   Keep the calibration card completely still during the calibration process.

3. Select CALIBRATE at the bottom of the RECORD screen.

4. Wait until the calibration is complete and you see an on-screen confirmation.
5. If the calibration was unsuccessful, repeat steps 1 to 4.

6. Verify the calibration. Ask the participant to focus on a known object and check that the gaze indicator in the live view matches what the participant focuses on. You can re-use the calibration card if there is no obvious thing to focus on. Check that the gaze indicator in the live view matches what the participant is focusing on.

6.2.3 What calibration does

The human eye shows a natural individual variation in its shape and geometry. For example, the exact location of the fovea, the area responsible for the part of the visual field that we perceive in focus and full color, varies from individual to individual. Tobii Pro eye trackers use an individual calibration procedure to optimize their gaze estimation algorithms (i.e. the 3D eye model) and account for this variation. The end result of this optimization is a fully customized and more accurate gaze point calculation.

6.2.4 Troubleshoot calibration

If you are having trouble getting the calibration to work, check the following:

- The participant should be focusing on the calibration card before you start the calibration.
- Direct sunlight and devices that emit IR light (e.g. halogen lights) may interfere with the eye tracking sensors. Avoid using the Pro Glasses 3 in direct sunlight or near other IR sources. Tobii Pro sells tinted IR Blocking Lenses that can be used when testing is required to be done in such environments.
- Avoid flickering light sources.
- Make sure there are no other objects visible in the scene view that look similar to the calibration card. The green calibration marker should follow the calibration card and not jump around in the scene view.
- Too dark or too brightly lit environments can also cause trouble with the calibration. Try making the calibration in another room or area with different lighting conditions.
- The distance between the eye tracking cameras and the eye can affect the calibration and tracking quality. Try fitting the glasses with the alternative nose pads to change the distance.

6.2.5 Start the recording

To make a recording from Pro Glasses 3 controller after calibration, Click Record at the bottom of the screen to start the recording. A timer displays to indicate that the recording has started.
6.2.6 End the recording

Recordings in progress can only be stopped when the recording unit is connected to the device running Pro Glasses 3 controller application. To stop the recording, do the following:

1. Click the **STOP** button at the bottom of the screen.
   When you stop the recording, a pop-up displays information about the recording including the participant name, gaze coverage and duration. From here you can also navigate to View Recordings and view the newly created video.

2. In the pop-up window, click **STOP** to confirm the command.
   - The recording is still ongoing until you click **STOP**. To continue the recording without stopping, click **CONTINUE RECORDING**.

3. To view the new recording, see [Work with recordings](#).

6.3 Work with recordings

6.3.1 Locate and play a recording

Recordings can be found and accessed from the **Recordings** list in Pro Glasses 3 controller. The live view functionality enables you to view and hear live video/audio from the Pro Glasses 3 head unit with real time eye tracking data overlaid.

Playback only works when the recording unit is connected to the device with Pro Glasses 3 controller application.

1. Click **VIEW RECORDINGS** in the Pro Glasses 3 controller menu.
2. In the side menu, scroll and select the recording to view.

3. The recording will start playing automatically. To pause the playback, click anywhere in the video or click the pause icon at the bottom left of the screen.
A weak or low quality WLAN signal might decrease the quality of, or even interrupt, the live viewing video in Pro Glasses 3 controller application or disconnect the recording unit from the device. You get the best possible live viewing quality when you use an Ethernet cable to connect to the recording unit.

The live view audio is muted by default. Avoid audio feedback; it may occur if the Pro Glasses 3 head unit is too close to the device you use for Live View.

Video/Audio and eye-tracking data is stored only on the SD card inside the recording unit, not on the Pro Glasses 3 controller application device. For any replay to work, the recording unit with the SD card used during the recording must be connected to Pro Glasses 3 controller application.

Below you can see the different playback functions in the video playback screen.

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.Play/pause playback</td>
<td>Use this button to start or pause playback of recorded footage.</td>
</tr>
<tr>
<td>2.Adjust or mute volume</td>
<td>Use this button to adjust the volume or mute your audio for the recording.</td>
</tr>
<tr>
<td>3. Playback progress bar</td>
<td>Use this button to see the progress of the playback.</td>
</tr>
<tr>
<td>4. Playback time/total time</td>
<td>Use this button to see the current playback time and the total recording time.</td>
</tr>
<tr>
<td>5. Toggle full screen mode</td>
<td>Use this button to switch between full screen and normal screen display.</td>
</tr>
</tbody>
</table>

6.3.2 Delete a recording

When you delete recordings, the recording unit with the associated inserted SD card must be connected to Pro Glasses 3 controller application.

How to delete a recording:

1. Click **VIEW RECORDINGS** in the sidebar menu.
2. In the left side menu, click the checkbox to the left of each recording you wish to delete.
3. Click the delete icon in the top right corner of the side menu.

4. In the pop-up window, click **DELETE** to confirm the deletion. Click **CANCEL** to cancel the action and return to the previous screen.

   To select all recordings in the side menu, click the check box at the top of the list.

### 6.4 Additional operations

#### 6.4.1 Display the Pro Glasses 3 recording unit properties

Every recording unit has unique Device name, Serial number, Firmware version, etc. This information is accessible through Pro Glasses 3 controller application.

**How to display the recording unit properties:**

1. In Pro Glasses 3 controller application, select the desired recording unit from the **RECORD** screen.
2. The selected recording unit displays how much battery time remains and the amount of time left on the SD card.
3. For additional information about the selected recording unit, select the cogwheel icon to the right of the recording unit name.

   Note: A green spot on the cogwheel means a firmware update is available.
When the recording unit's card is expanded by clicking the cogwheel, the following additional information is displayed:

- Firmware version
- Firmware update link if one is available

### 6.4.2 Pro Glasses 3 API

Pro Glasses 3 uses a REST API intended for developers that want to integrate with third party solutions. For high level information on the functionality of the API and how to use it, please refer to the Pro Glasses 3 Developer Guide, available on [Tobii Pro Connect](https://www.tobii.com/pro-connect/).

To use the API and get specifics about its commands and operation (built-in documentation), open the API in the Glasses 3 browser.
7 Product Care

7.1 Operational environment
The recommended range for temperature and humidity during operations is as follows:

- **Temperature:** -5°C to 45°C (32°F to 113°F)
- **Humidity:** 5% to 95%

ETSI 300 019-2-7 V3.0.1, Portable T7.2 (Partly temperature-controlled locations).

7.2 Transportation
Use the provided case when traveling with the eye tracker. For shipping and storage, use the original packing.

For transportation, the recommended range for temperature and humidity for the device is as follows:

- **Temperature:** -40°C to 65°C (-40°F to 149°F)
- **Humidity:** 5% to 95%

ETSI 300 019-2-2 V2.4.1, T2.3 (Public transportation) with exception of high air temperature at +65°C.

7.3 Storage
For shipping and storage, use the original packing.

For storage, the recommended range for temperature and humidity for the device is as follows:

- **Temperature:** -25°C to 55°C (-13°F to 131°F)
- **Humidity:** 5% to 100%

ETSI 300 019-2-1 V2.3.1, T 1.2 (Weather protected, not temperature-controlled storage locations).

7.4 Cleaning

Avoid touching, scratching, or smudging the lenses on the Pro Glasses 3 head unit or the Corrective Lenses (optional accessory) and keep all the surfaces clean. Eye tracking quality may be degraded if surfaces are dusty or damaged. Take special care to ensure that there are not smudges or scratches covering either the illuminators or sensors in the lenses as these can impair performance.

Do not use window cleaners, household cleaners, aerosol sprays, solvents, alcohol, ammonia, or abrasives on any component of the Pro Glasses 3 system.

Before cleaning Pro Glasses 3, unplug the head unit cable.
Use the included cleaning cloth and clean the Pro Glasses 3 lenses gently.

Avoid getting moisture in openings and ports on the device.

7.5 Disposal of the eye tracker

Do not dispose of your Tobii Pro eye tracker in general household or office garbage receptacles. Follow your local regulations for the proper disposal of electrical and electronic equipment.

8.5 Pro Glasses 3 controller application system requirements

These are the minimum system requirements for the Pro Glasses 3 controller application:

<table>
<thead>
<tr>
<th></th>
<th>Windows</th>
<th>Android</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating System</td>
<td>Windows 10 64-bit Professional or Enterprise, version 2004</td>
<td>Android OS version 9 or later</td>
</tr>
<tr>
<td>CPU</td>
<td>Intel® Core™ i5 (quad core), 6th generation or better</td>
<td>Snapdragon 835 (8 cores, 2.0GHz) or equivalent</td>
</tr>
<tr>
<td>Memory</td>
<td>8 GB RAM</td>
<td>6 GB RAM</td>
</tr>
</tbody>
</table>

8.6 Compatible Android devices

There is a very wide range of Android devices available on the market, each with its own unique combination of hardware specifications. While most devices meeting the minimum requirements should work with the Pro Glasses 3 Controller application, Tobii Pro cannot guarantee it. The following table lists the Android devices Tobii Pro has tested and verified.

<table>
<thead>
<tr>
<th>Manufacturer</th>
<th>Device</th>
</tr>
</thead>
<tbody>
<tr>
<td>OnePlus</td>
<td>6t (Android 10)</td>
</tr>
<tr>
<td>Samsung</td>
<td>Galaxy S8 (Android 9)</td>
</tr>
<tr>
<td>Google</td>
<td>Pixel 4XLs (Android 10 and Android 11)</td>
</tr>
</tbody>
</table>

Huawei devices are not supported due to incompatibility with the Google services.
9 Compliance Information

9.1 Australia and New Zealand compliance
The RCM (Regulatory Compliance Mark) label signifies compliance with the Australian and New Zealand product safety requirement for electrical and electronic equipment according to EESS and radio communication and electromagnetic compatibility according to ACMA.
Tobii Pro Glasses 3 is registered at the Australian National Equipment Registration System.

9.2 China compliance
The Tobii Pro Glasses 3 recording unit and its operation comply with the following standards:
- GB 4943.1-2011 (Chinese Standard)

9.3 EU Compliance
9.3.1 Conformity with EU directives
Tobii Pro AB declares that this device is in compliance with the essential requirements of the following EU directives:
- 2014/35/EU Low Voltage Directive (LVD)
- 2014/30/EU Electromagnetic Compatibility (EMC) Directive
- 2011/65/EU Restriction of Hazardous Substances (RoHS) Directive

9.3.2 CE marking
All Tobii Pro Glasses 3 are CE-marked, indicating compliance with the essential health and safety requirements set out in European Directives.

9.3.3 WEEE marking
Pro Glasses 3 is compliant with the Waste Electrical and Electronic Equipment (WEEE) Directive 2012/19/ EU

9.4 Japan compliance
The Tobii Pro Glasses 3 recording unit and its operation comply with the following standards:
- J60950-1(H22) (Japanese Standard)
The Pro Glasses 3 head unit complies with:

- J62368-1(H30) and IEC 62368:2014 2nd Edition

The Pro Glasses 3 recording unit complies with:

- Telefication, certification number 201-150060

### 9.5 Korea compliance

The KC (Korea Certification) mark signifies compliance with Korea’s product safety requirements for electrical and electronic equipment and is issued by Korea-based certification bodies that have been approved by the Korea Standards Association.

### 9.6 United States and Canada compliance

#### 9.6.1 FCC interference and Industry Canada statement

Pro Glasses 3 recording unit has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Tobii Pro Glasses 3 can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If Tobii Pro Glasses 3 does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by increasing the separation between Tobii Pro Glasses 3 and the receiver. Modifications not expressly approved by Tobii Pro AB could void the user’s authority to operate the equipment under FCC rules.

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

#### 9.6.2 ETL compliance

The Pro Glasses 3 recording unit complies with UL 60950-1 and CAN/CSA C22.2 No. 60950-1-07, certification number E180881.
9.6.3 UL compliance

The Pro Glasses 3 recording unit E180881 is compliant with UL 508A.

9.7 Electromagnetic compatibility compliance

Pro Glasses 3 complies with the following emission and immunity standards:
- FCC 47 CFR Part 15, Class B
- ICES-003 Issue 6, Class B
- EN 55032:2015, Class B
- EN 55035:2017
- CISPR 32:2015, Class B
- CISPR 35:2016

In addition to the above, the Pro Glasses 3 recording unit complies with the following emission and immunity standards:
- EN 61000-3-2:2014
- EN 61000-3-3:2013
- EN 61000-6-1:2007

9.8 Safety compliance

Pro Glasses 3 complies with the following safety standards:
- IEC/EN 62471:2008, Photobiological safety of lamps and lamp systems
- EN 62311:2008, Specific Absorption Rate

Pro Glasses 3 head unit complies with the following standards:
- IEC 62368-1:2014 2nd Ed, Audio/video, information and communication technology equipment Part 1: Safety requirements

Pro Glasses 3 recording unit complies with the following standards:
Appendix A  Support, Learning Center, and Warranty

A1  Customer Support
If you need help, please contact Customer Support at Tobii Pro. In order to receive assistance as quickly as possible, make sure you have access to your Tobii Pro device and, if possible, an Internet connection. You should also be able to supply the serial number of the device, which you will find on a sticker on the back or bottom of the device.

A1.1  Get help online
Many questions can be answered by visiting Tobii Pro Connect. It contains the latest information about contacting Support, links to our Learning Center, and much more. Log in or register to see information about your account and to reach Customer Support on Tobii Pro Connect.

A2  Learning Center
If you are new to eye tracking, or want to extend your knowledge about eye tracking research, sign up for one of our learning programs and events, or browse through our extensive article library in our Learning Center.
For further product information and other support resources, please visit tobiipro.com.

A3  Warranty information
Read more about Tobii Pro Care and Tobii Pro’s eye tracker warranty in the Tobii Pro Service Description.
Appendix B  Limitations and considerations

B1  Intended use
Tobii Pro eye trackers are intended to be used in research activities about human behavior including eye movements, in a dry and dust free indoor environment. The product should only be used as described in this User’s Manual. Please read the User Manual and other supplied documentation thoroughly before using the product.

B2  Light conditions
Tobii Pro recommends that eye tracking studies be performed in a controlled environment. Sunlight should be avoided since it contains high levels of infrared light which will interfere with the eye tracker system. Sunlight affects eye tracking performance severely and longer exposure can overheat the eye tracker. This eye tracker is not designed for exposure to (direct) sunlight. Eye tracking generally does not work in strong direct sunlight.

Shielding the eye tracker adequately from the sun may prevent sunlight from interfering with eye tracking.

B3  Eyelashes
Long eyelashes can be obstructive when the participant’s eyes are less open, especially if the participant is wearing mascara. In rare cases, eyelashes may completely block the view of the participant’s pupils, making eye tracking impossible.

B4  Droopy eyelids
Droopy eyelids or otherwise obstructive eyelids can block the view of the participant’s pupils. In rare cases, such eyelids may completely block the view of the participant’s pupils, making eye tracking impossible.
Appendix C   Sync Port

The recording unit is equipped with a sync port capable of transmitting and receiving a sync signal to and from external devices.

The sync port is a standard 3.5 mm jack in which the tip is used for receiving a sync signal, the middle ring is used for transmitting the sync signal, and the sleeve is the ground.

C1   Sync-out

Sync-out is emitted from the recording unit using a standard TTL 3.3 V signal, described as a high signal (1 (one)), or a low signal (0 (zero)).

Implementation

- The sync signal, which is 10 000 ms long, starts when the recording starts, and is initiated by a start sequence in the following format: One 500 ms long high pulse, (3.3 V), followed by a 500 ms long zero pulse (0 V), repeated three (3) times.

- During the recording the sync pulse is emitted once every ten seconds with a duration of 1000 ms, followed by a 9000 ms long zero pulse, and so on.

- When the recording is terminated, the sync pulse stops immediately. No stop sequence is transmitted.

C2   Sync-in

Sync-in is triggered by the recording unit using a standard TTL 3.3 V signal, described as a high signal 1 (one), or a low signal 0 (zero).
Appendix D  Calibration Target

Below are two scale illustrations of the Pro Glasses 3 Calibration Target; one with accurate dimensions illustrated (below left) and one without (below right). The right-hand target can be printed, cut out and used for calibration with Pro Glasses 3.

Please verify that the dimensions of the printout are accurate, as stated in the below left illustration.

If you want to use a printed Calibration Target, you can print and cut out the right-hand Calibration Target (above). Make sure your printer is set to print at 100% scale. The printed Calibration Target must have the exact dimensions defined in the left figure. If other dimensions are used, the calibration may be inaccurate.
Support for Your Tobii Pro Device

Get Help Online
Visit Tobii Pro Connect for help with your Tobii Pro device. It contains the latest information about contacting Support, links to our Learning Center, and much more. Visit connect.tobiipro.com.

Contact Your Solution Consultant or Reseller
For questions or problems with your product, contact your Tobii Pro sales representative or authorized reseller for assistance. They are most familiar with your personal setup and can best help you with tips and product training. Visit tobiipro.com/contact.
